

### **Maintenance Dredging of Previously Dredged Areas General Permit**

A General Permit is available for maintenance dredging of previously dredged areas under NR 345, Wis. Adm. Code. If the waterway where the proposed project is located is listed on the DNR web site as an Area of Special Natural Resource Interest or as an area of Public Rights Features, an individual permit is needed and this application package should not be used. If the applicant can provide documentation that a previous DNR permit was issued for the project you may use this form even in ASNRI & PRF. To qualify for this general permit, your project must meet the following conditions:

1. With this application, you must submit photographs showing the entire project site in relation to the navigable watercourse in pre-construction condition.
2. On trout streams and perennial tributaries to trout streams, dredging is prohibited between September 15 and May 15 of any calendar year.
3. On all waterways that are not trout streams, dredging of waterways north of Hwy 29 is prohibited from April 1 to June 1 annually.
4. On all waterways that are not trout streams, dredging of waterways south of Hwy 29 is prohibited from March 15 to May 15 annually.
  - a. You may request that the time of year requirement be waived which will be considered by the departments local fisheries staff on a case-by-case basis
5. The applicant shall provide information that the dredged material does not contain any hazardous substances as follows:
  - Through the collection and laboratory analysis of the dredged material in compliance with ch. NR 347.
  - Through the review of historical dredge material information from the vicinity of the proposed project that was collected and analyzed in accordance with NR 347
  - By assessing the potential for hazardous substances to be present based upon the characteristic of the watershed, industrial and municipal discharges to the waterbody and dredge material data from similar waterways
6. If the department determines that a proposal submitted under this section has the potential to impact an endangered or threatened species in accordance with s. 29.604, Stats., the application shall be deemed incomplete. The department may not consider the application complete or issue a general permit until the applicant submits information to demonstrate one of the following:
  - b. that the project either avoids impacts to the threatened or endangered species or
  - c. that the project has received an incidental take authorization under 29.602, Stats.
  - d. If the project is modified, the applicant must submit the revised plan before the application can consider the application complete or issue a general permit.
7. The total amount of material removed from the area shall be less than 3000 cubic yards or, if greater than 3000 cubic yards, a previous environmental assessment or environmental impact statement shall meet the requirements of s. NR 150.
8. Dredging may not exceed the volume or extend beyond the dimensions of the previously constructed dredge project.
9. After or during dredging, any removed material may not be temporarily or permanently placed in a wetland, floodplain, or below the OHWM of a navigable waterway.
10. The applicant is the riparian owner or has permission of the riparian owner to remove bottom material.
11. The applicant has provided information that the area meets the requirements of "previously dredged areas" as follows:
  - a. The applicant can demonstrate that the previous dredging was permitted by the Department.
  - b. The applicant provides historical information documenting the previous removal of material including date of dredging, the volume of material removed and location of the material disposal.
12. Bottom materials shall be removed and transported by equipment which is designed and properly sized to minimize the amount of sediment that can escape into the water.
13. All equipment used for the project shall be adequately de-contaminated for invasive and exotic species prior to use and after use. All equipment that comes in contact with infested waters, including but not limited to tracked vehicles, barges, boats, silt or turbidity curtain, sheet pile and pumps, shall be thoroughly disinfected.
14. The permittee shall submit a series of photographs of the completed project to the department within 10 days of project completion.

If your project will meet all the above requirements, follow the instructions on the following pages to submit a General Permit Application to the Department. We will respond within 30 days to notify you that your project is approved, or that additional information is required to complete your application. In some cases, you may be notified that your project requires an Individual Permit.

## Application Requirements

All applications for a General Permit require a completed General Permit Application form #3500-108, with additional sheets as necessary. Follow the instructions below to complete the application form.

### Section I: Landowner Information

Provide the legal name of the person, firm, public organization or any other entity that owns the project site described in Section III of the application. The contact person should be the person completely familiar with the construction site activity and charged with compliance and oversight of the permit. The mailing address, phone number, and e-mail address if available, should be for the contact person.

### Section II: Contractor Information

If known at the time of application, provide the legal name of the person, firm, or any other entity that will be the major contractor in charge of the proposed project at the site described in Section III of this application. The contact person should be the project site manager completely familiar with the activity and charged with implementation of the permit. The mailing address, phone number and e-mail address if available, should be for the contact person.

### Section III: Site Information

Provide the site's official or legal name and complete address, including county, city, state and zip code. Provide the name of the waterway where the project is located. List the public lands survey location [quarter-quarter, quarter, section, township and range (to the nearest quarter section)] of the site. If the site is more than one quarter, enter the quarter that best describes the location of the site. The web site at the link below can help you with the public lands survey location: <http://maps.dnr.state.wi.us/imf/dnrimf.jsp?site=webview>. Use additional space if needed to describe the site location.

### Section IV: Additional Information

**Dates:** Enter the project's anticipated start and end dates.

**Photos:** Enter the date of photographs included with the application. Attach or enclose clear photographs of the project site. Include at least one front view and one side view that each depict the area where construction work will occur from the waterway, and one view of the entire site from the waterway. Too much snow cover or vegetation may obscure important details, so be sure that your photographs show the site in its existing condition. NOTE: You will also be required to submit photographs after your project is completed.

### Section V: Location Sketch, Materials List and Project Plans

*Refer to the sample diagram on page 4 for assistance*

**Location Sketch:** Provide a sketch or map that identifies the project site referenced to the nearest town road or county/state highway. Be sure the map has enough detail so that we can easily find the site. Include your fire number if applicable.

**Materials List:** Provide a list indicating the size, type, and quantity of materials that you plan to use for the project.

**Project Plans:** Provide scaled plans showing the top and cross-section views, on the blank plan sheet in the application and additional sheets of 8-½ x 11-inch or 11 x 17-inch paper as necessary. Also submit a narrative summary of all information. Include the following in your plans and narrative:

1. The scale of the plan.
2. Existing and proposed waterway bed grades and materials.
3. Location of temporary and permanent placement of spoil materials.
4. Estimate of total amount of material to be removed.
5. Verification of non-contamination as described above.
6. Verification of previous permit and/or previous dredging as described above.
7. Duration of project.
8. Narrative of how project will be completed.
9. Written permission from all affected property owners.
10. ALL NECESSARY INFORMATION. All other information needed to show that the project will comply with

the conditions identified on page 1 of these Instructions.

**Submit your application**

A \$50 fee is required for each Maintenance dredging of previously dredged areas General Permit. Remit a check or money order payable to the Wisconsin Department of Natural Resources (do not send cash). An application submitted without the required application fee will be considered incomplete.

**Submit three (3) copies of the completed application, narrative and plans.** Send the complete application and fee to the DNR office listed below:

**NORTHERN REGION COUNTIES**

Ashland	Lincoln	Aquatic Habitat Coordinator
